

BioPak Composting

If you're looking to change to compostable options, consider introducing an organics bin for your food scraps and compostable products. Did you know that 1kg of organic waste decomposing in landfill produces 1.9kg of CO₂ emissions?

BioPak's organic service will help you eliminate food waste and compostable packaging from landfill, reducing your carbon footprint and creating a valuable new resource.

Costs

BioPak Compost Service Pricing				
Bin size	Lift price per bin collection + GST	Excess kilo charge per kg*	Futile fee	Bin rental per month (includes gravity latch lock)
 120L	\$20.18 + GST	\$0.20	\$19.50	\$8.67
 240L	\$25.36 + GST	\$0.20	\$19.50	\$8.67
 660L	\$56.90 + GST	\$0.20	\$19.50	\$13.33
 1,100L	\$77.62 + GST	\$0.20	\$19.50	\$13.33

Excess weight charges will apply to each kg over the maximum weight limited stated above. Contaminated bin rate charged if contaminated bin is collected. Futile fee is charged if bin is too contaminated and collection is refused.

What is included

- Weekly collection and bin hire if needed.
- A wide range of promotional material to communicate the benefits of your composting.
- Signage that visually explains the do's and don'ts.
- A step-by-step guide on how to educate your staff and customers.

To Organise:

Visit: www.biopak.com.au/compost-service.

On this page you can download the Melbourne information pack with pricing, collection zones and contract details. BioPak requires a 12 month contract. Service can commence within 5 business days.

Note: Compostable packaging put into your compost bin will need to meet Australian Composting Standards AS 4736 or AS 5810.
